

TEDELTA
CAPPING SOLUTIONS

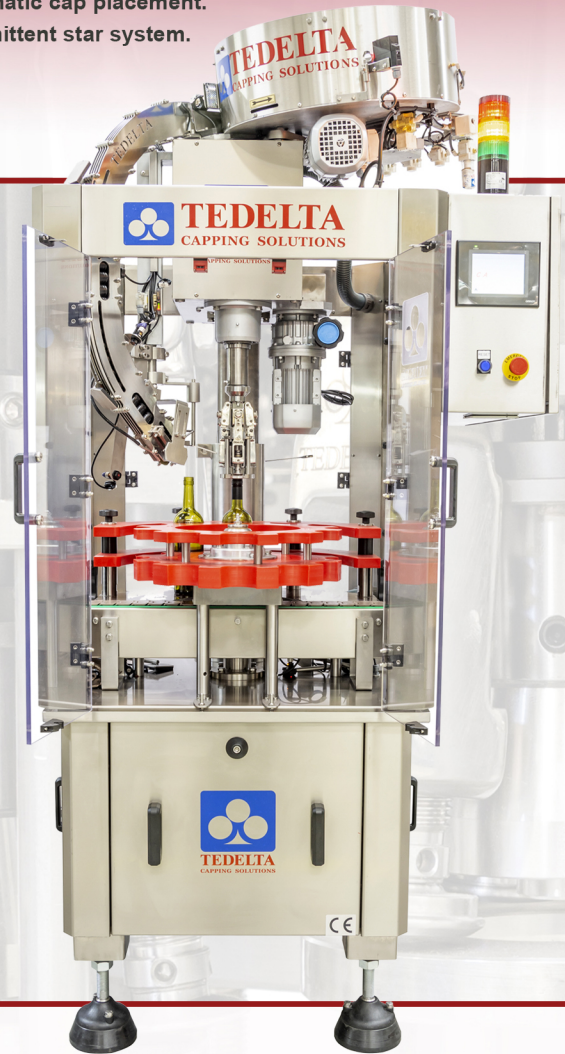

SEMI-AUTOMATIC MACHINE CSA-101

- . Automatic operation, raising and lowering CR-504 head.
- . Head speed and rotation control by a variable speed motor.
- . Specially designed for small, one-off production runs.

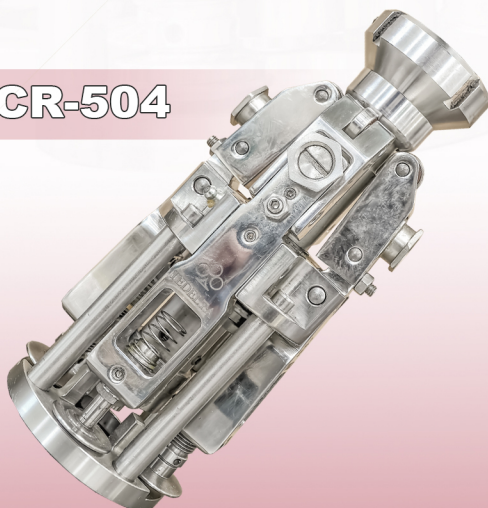

INLINE CAPPING MACHINE CAL-101-ST

- . Production runs up to 3,000 bottles/hour
- . Automatic cap placement.
- . Intermittent star system.

CR-504

CR-804

SEALING HEAD.

- . Stainless steel construction
- . Designed for safe, high-quality capping for bottles, with Pilfer proof, Stelvin aluminium caps.
- . Can be used on other manufacturer's machines with the appropriate adapter.
- . Roll on capping head equipped with 2 skirting roller and 2 threading roller guides.
- . Safety system to prevent damage to the neck if no cap is in place.

DUPLEX ROTARY CAPPING MACHINE CAR 108-TR-PR-ST

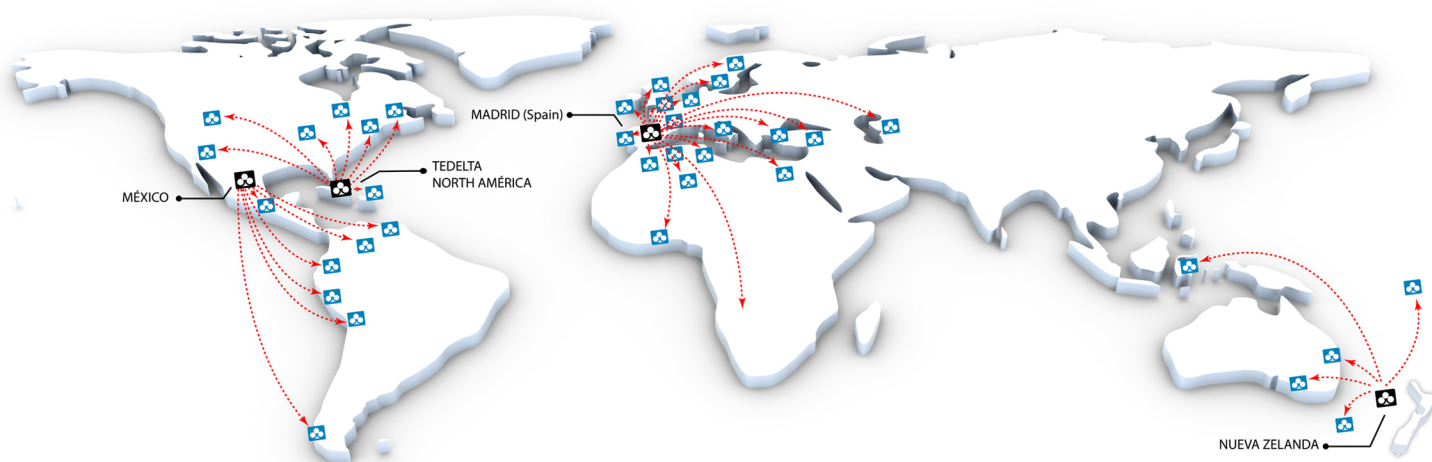

DESCRIPTION

- . Large and medium-sized production runs, from 3.000 to 60.000 b/h.
- . Designed specially for aluminium caps, fitments and T-cork type or other.
- . Delivery of the cap: "Pick-off" and "Pick & place" systems.
- . Manufacturing capabilities from 3 (three) to 24 (twenty-four) sealing heads.
- . EC Directive/USA compliance.

Tedelta has developed a wide range of capping machines for a wide variety of industry sectors. We offer capping solutions for roll-on aluminium, press-on, screw-on plastic closures, T-Cork and special shape caps.
